

**National Science Foundation**  
**(Chapter references are taken from the PAPPG)**

**Organizational Changes**

- Office of Polar Programs and Office of Cyberinfrastructure now report to Office of the Director.

**Significant Changes to Proposal Preparation and Submission**

**Chapter I.G.1, Electronic Requirements**

- Proposals can now contain high resolution graphics and color.

**Chapter II.C.2.b, Project Summary**

- FastLane has been modified to display three separate text boxes (up to 4,600 characters in total) in which proposers must provide an “Overview” and address the “Intellectual Merit’ and “Broader Impacts” of the proposed activity (still

### **Chapter II.C.2.g(vi)(e)**

- Foreign subawardees are not eligible for indirect cost recovery unless the subawardee has a previously negotiated rate agreement with a U.S. Federal agency that has a practice of negotiating rates with foreign entities.

### **Chapter II.C.2.g(viii), Indirect Costs**

- Except as noted in GPG II.C.2.g(v) and II.D.9 or in an NSF program solicitation, the applicable indirect cost rate(s) negotiated by the organization with the cognizant negotiating agency must be used in computing indirect costs (F&A) for a proposal.

### **Chapter II.C.2.i, Facilities, Equipment and Other Resources**

- An aggregated description of the internal and external resources that are, or will be available to the project (both physical and personnel) should be provided.
- A new format for submission of the Facilities, Equipment and Other Resources information will be available in FastLane effective in January 2013.
- The new format will assist proposers in complying with the NSF cost sharing policy.
- Proposers should not include any dollar amounts, costs, dates of acquisition, etc. for any facilities, equipment and other resources. These figures can be interpreted as cost-sharing which is unallowable by the NSF. If there is no facilities, equipment and other resources information, a statement to that effect should be included in this section of the proposal and uploaded into FastLane.

### **Chapter II.D.6, Proposals Involving Vertebrate Animals**

- PAPPG now includes guidance on review of wildlife research protocols, and instructions clarifying submission of IACUC approval information.

### **Chapter III, NSF Proposal Processing and Review**

- NSF wants to stress the importance of integration of research and education and broadening participation as core strategies, as outlined in NSF's strategic plan.

### **Chapter III.A, Merit Review Principles and Criteria**

# NSB Task Force on Merit Review

- Established Spring 2010
- Rationale:
  - More than 13 years since the last in-depth review and revision of the review criteria
  - Opportunity to align review criteria with NSF's new Strategic Plan
  - Persistent anecdotal reports about confusion related to the Broader Impacts criterion, and inconsistency in how the criterion was being applied.

# Final Report: Conclusions

- The Intellectual Merit and Broader Impacts review criteria together capture the important elements that should guide the evaluation of NSF proposals.
- Revisions to the descriptions of the Broader Impacts criterion and how it is implemented are needed.
- Use of the review criteria should be informed by a guiding set of core principles.

# Final Report: Recommendations

1. Three guiding review principles
2. Two review criteria
3. Five review elements

# Merit Review Criteria Guiding Principles

- All NSF projects should be of the highest quality and have the potential to advance, if not transform, the frontiers of knowledge.
- NSF projects, in the aggregate, should contribute more broadly to achieving societal goals.
- Meaningful assessment and evaluation of NSF funded projects should be based on appropriate metrics, keeping in mind the likely correlation between the effect of broader impacts and the resources provided to implement projects.

# Merit Review Criteria

When evaluating NSF proposals, reviewers should consider what the proposers want to do, why they want to do it, how they plan to do it, how they will know if they succeed, and what benefits would accrue if the

# Five Review Elements

The following elements should be considered in the review for **both criteria**:

1. What is the potential for the proposed activity to:
  - a. advance knowledge and understanding within its own field or across different fields (Intellectual Merit); and
  - b. benefit society or advance desired societal outcomes (Broader Impacts)?
2. To what extent do the proposed activities suggest and explore creative, original, or potentially transformative concepts?
3. Is the plan for carrying out the proposed activities well-reasoned, well-organized, and based on a sound rationale? Does the plan incorporate a mechanism to assess success?
4. How well qualified is the individual, team, or institution to conduct the proposed activities?
5. Are there adequate resources available to the PI (either at the home institution or through collaborations) to carry out the proposed activities?

Researchers can do business with NSF  
through a suite of services

# Report Components

## Mandatory Category:

- Accomplishments: What was done? What was learned?

## Optional Categories:

- Products: What has the project produced?
- Participants & Other Collaborating Organizations: Who has been involved?
- Impact: What is the impact of the project? How has it contributed?
- Changes/Problems
- Special Reporting Requirements (where applicable)
- Appendix 1: Demographic Information for Significant Contributors

# Key Differences of the New Project Report System

Project reporting dashboard

Structured collection of data

Rich text editor

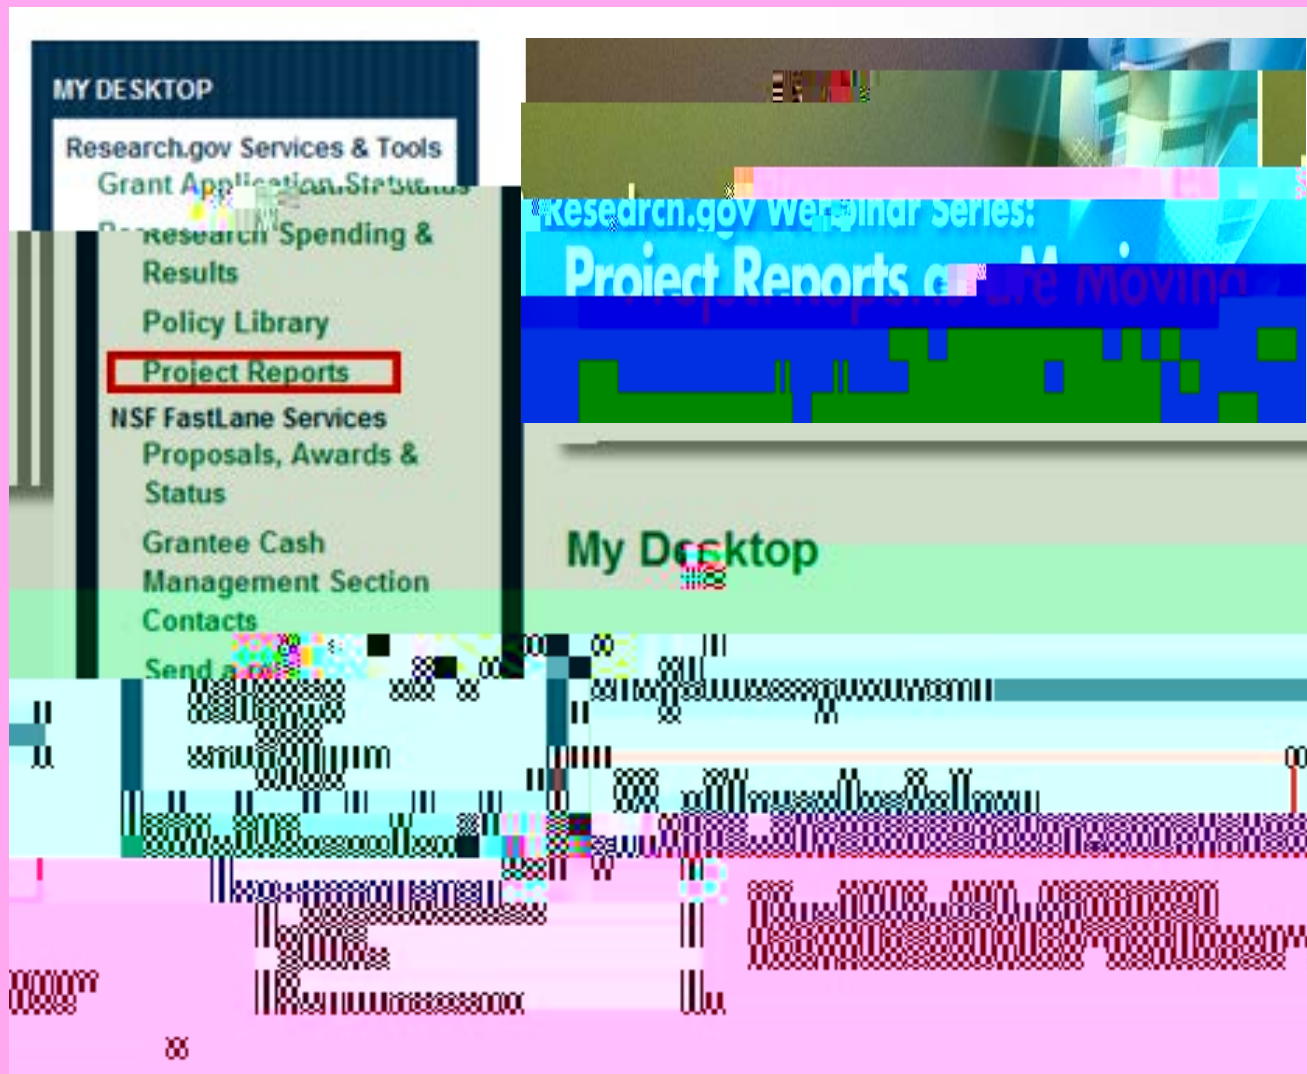

PDF upload to support images, charts, and other complex graphics

Improved citation search through Thomson Web of Science

Special reporting requirements are controlled by solicitation

PI no longer provides demographic information on significant participants
